HOUGHTON COLLEGE HOUGHTON, N. Y., MARCH 24, 1933

11 Day

### Outstanding Speaker **Discusses** Question

Wednesday, March 15, students ing of the combined Junior and Sophwere priviledged to hear another out. omore classes was held for the purstanding speaker in the person of Dr. Harry Ironside of the Moody Memorial Church of Chicago. His subject, "The Prophetic Seal on the Bible as a Proof of Its Divinity" was a convincing argument on a question much disputed by some of our contemporaries.

Surrounded though we are by a Christian atmosphere, many of the beliefs of our fathers are in question, and this subject as to whether the Bible is inspired of God or a collecdisputed.

The clearest proof of the divine ement. A lecturer trying to prove Staff will be made at a later date. that people believe in the Bible merely because of parental influence and teaching caused Dr. Ironside to begin a study of the sacred literature of the world. Having completed his study he found that in spite of many beautiful things, gems of thought, and moral truths contained in the relicould not be duplicated in the Bible. More convincing yet was the fact that not one of them contained a distinctive prophecy that ever has been or even has a chance of being fulfilled. The Bible is the only book of prophecy in the world.

Dr. George Hill on a tour of Palestine had the opportunity of spending two weeks in either Palestine or Egypt and chose the former while a friend went to Egypt. The reason the friend gave was his dislike for desolate Palestine which looked to him like a land "burned over with brimstone". His astonishment was great to learn from Dr. Gill that he was fulfilling a small part of a prophecy of 3500 years, for in the 29th chapter of Deuteronomy Moses tells his people that "the stranger shall come from a far land and say.... the whole land therof is brimstone."

Even more remarkable is the prophecy of the scattering of the sons of Isaac. Moses might just as easily have said the sons of Ishmael or Esau or Jacob, but the ensuing centuries would have proved him wrong for the Ishmaelites are still where they were 3500 years ago. Just as foretold the cities of Edom are long since desolate and the people disappeared. Without divine help how could these things have been unerringly predicted?

No where else does one small paragraph relate the story of one people for 2000 years but in the Bible and that written before the period began We learn that they "will abide with out a king" and history has proven that the Jews have remained a separate people with their own chacteristics but without even a pretender to the throne. It is interesting to note

### Chapels

MONDAY CHAPEL Miss Kartevold lead devotions. TUEDAY CHAPEL

Miss Burnell lead the morning asembly and based her thoughts upon a Scripture reading from the seventh chapter of Matthew, a portion from the Sermon on the Mount. The keynote seemed to be struck in the words" Beware of false prophets". With this thought in mind, Miss Burnell presented some striking facts from the field of advertising in which she exposed the tendency of many producers to misrepresent their products to the gullible public through the medium of advertisements. From this discussion rose the question, "Are we really what we pretend to be?"

Attention was then turned to the application of that principle to Houghton. In order that the individual might represent his school properly a list of qualities was enumerated. Briefly, they include: High standards of preparation, cooperation, honesty and sincerety in every day life, courtesy, work, self control, and service. "Train for true values and matters of dress become less important...

As a final thought the question was sked, "Am I as a Christian in my daily life misrepresenting the true teachings of Christ?" "For what shall it profit a man if he gain the whole world and lose his own soul?" WEDNESDAY

Prof. Leroy Fancher read verses depicting the Gospel story of the humiliation and crucifixion of Christ.

#### TUESDAY PRAYER

On Tuesday evening, March 21, the student body enjoyed another splendid prayer service under he direction of Miss Helen Wiltsie. We realize that good prayer services are beginning and not at an end. As a group we resent the fact that at various times we hear that Houghton is becoming "luke warm" spiritually. Anyone who regularly attends these Tuesday evening services cannot truthfully voice such opinions.

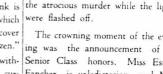

Miss Wiltsie chose for the Scripure lesson. Isaiah 26:3— "T' wilt keep him in perfect peace, whose mind is stayed on Thee; because he trusteth in Thee." Around this promise the remainder of the service

was cenered.

### Dr. Ironsides

(Continued from Page One) that even in America, "The Melting-Pot" there are no Jewish-Americans but American-Jews. They have been 2000 years "without a sacrifice", 'without an image", and "without an ephod", and yet without these religious elements to bind them together they are still one people. ## **Open Forum**

My dear Mr. Editor:

"Ideals" may be cumbersome excess baggage. Lut just t'e same som people have lived with certain ideals so long that the suggestion of a divorce from them causes the most intense pain. Eight years spent in school at Houghton, once upon a time, sent the writer of this article iorth in: the world with some rather clearly defined opinions. Among these was the idea that Houghton was a place where a person could come and be guided more by what he was than by what he wore; where fervor of spirit counted rather more than fashion of dress; where studious habits attracted quite as much attention as style of all. attire. These were among the things that sent this man forth to be for twenty-three years as loyal a supporter of Houghton as he has known how to be. Perhaps you can imagine, then, the depeening depression with which he read last week's "Open Forum", and wondered whether he had lived

to see the day when the opposite of all this would be true in Houghton. Now, statements that may pass in a classroom, as a certain figure of speech, assume entirely different proportions when offered to the reading public in any reputable magazine. Your humble servant believes that he earns money enough to clothe himself in the height of fashion, at least for a part of the year. But he knows he cannot do this and also do some other things that seem to him very much worth while. He further believes that he could afford to clothe his children in like fashion. But he knows he cannot do that and also give to them the start in life that he sincerely hopes they prefer to the clothes that he could otherwise buy them. He further knows that his thought in this matter agrees with that of the whole group mentioned in last week's Forum as "the faculty". He happens to know that that group is contributing \$7500 a year to the relief of human suffering and the propagation of the Gospel of the Lord Jesus. He further knows that in addition to this that sions. same group is spending \$3525 a vear to enable young men and women to continue their work in Houghton College and Seminary. If it really irratates too much the aesthetic sen sibilities of the one who leaped into last week's Forum to associate with such a group as that,-this group stepping forth out of the "Dark Ages"-since they cannot carry or know what I mean anyway), etc. I such philanthropic projects and still have no doubt that a student would meet his expectations in the way of be willing to loan any of his poss'sdress, then he will have to seek his company elsewhere. For there is not resents the method employed by a chance in a thousand that these some thoughtless folks who take people will change their thinking or these articles without consulting him. tioned group presents quite the bedraggled appearance that must have term "thoughtless' instead of "diswho read the Forum and did not see word. ### Church Services

### Sunday the Twelfth

A believer is a temple of God, and God's only tabernacle on earth un der teh Ne wk Testament dispensttion is redeemed humanity. God ha only one way of distinguishing menwhether or not they are fit for His use, for His indwelling.

The only barrier that keeps God out of a life is a stubborn will. man filled with the love of God is distinguished with a distinction with which none can compare. When God places His hand on anything and says it is His, it is holy because it belongs to Him.

In order to clear ourselves from those things which are defiling the of the Houghton College Choir def. temple of God, we must come to an agreement with what God has done and with what God is doing. The things which unmake us spiritually are our own contacts. "Be ve not unequally voked together with unbe-"What fellowship hath City, April 2, evening; some place in righteousness with unrighteousness? What communion hath light with ker's Store, New York City, 4 p.m., darkness? What accord hath Christ

> The man or woman who will not come out and be separate and refuse to touch the unclean things will not have the full life to which he is entitled. The steps to holiness are: be not unequally yoked, have no fellowship with unrighteousness, and touch not the unclean things. "Come out and I will be a father unto you." If a person is not willing to do all these things without counting the cost in his life, he is not worthy of Christ. If a person has to have all his problems explained to him before he meets them, he will not grow in the love of God as he should. It is necessary to yield oneself wholly to God and have faith that He will take care of us in every emergency.

### Topic on Nineteenth

Chastening is a corrective means. usually of an unpleasant character. by which a child is brought to fellowship with its parent in its viewpoint concerning his duty and priviledge.

God was dealing sternly with the Christians in Judea, and in the twelth chapter of Hebrews. Paul writes to them concerning the chastening of the Lord.

The chastening of the Lord is not to be dispised. This is contrary to our habit because we are apt to look down on those who are punished. We program was presented under the di- like those experiences which exalt us rather than those which humiliate us.

Chastening is proof of the love that God has for His sons. "Whom the Lord loveth. He chasteneth, and scourgeth every son whom he receiveth. Sometimes this may be the tree.

with Him.

Chastening is used in the administion of s What son is h was very unhappy? What was the whom the father chasteneth not?" A trouble? December wedded to true son has blessing in sorrow and correction.

It is also the true function of the Chloe Johnson— Lan' sakes, no, <sub>divine</sub> fatherhood. "We have had mum! It was Labor Day wedded fathers of our blood, which correct us, and we gave them reverence: shall

we not much rather be in subjection unto the father of spirits, and live?" The Lord chastens us for our profit that we may become partakers of His holiness. Our earthly fathers chasten us for a few days but they are not able to make us better than they are. God chastens us to make us better.

There are many paths to holiness. but only one true way. God's pathway is by way of chastening. This chastening brings peace. "Now no chastening for the present seemeth to be joyous, but grievous; nevertheless, afterward it yieldeth the peacable fruit of righteousness unto them which are exercised thereby."

Nobody amounts to anything exept through sorrow. Suffering sent by God brings us peace which passeth understanding, both to the individual and to the church.

#### HC Science Questionaire

QUESTION I: Would it ever be possible for a person to have less than 8 great granparents?

Each individual usually has 4 grand parents and 8 greatgrandparents But if two own cousins marry, their children will have only six great grandparents, since two of their grand parents will have common parentage. OUESTION II: Why are men more apt to be affected by colorblindness

than women? Each cell of the human body contains 24 pairs of chromosomes or bearers of heredity. In the male one pair of these is known as the XY chromosomes. The pair similiar to these in the female is known as the XXpair. The Y chromosome of the male is not supposed to bear hereditary factors. The person of male sex has the formula XY. If the X chromosome carries a gene for colorblindness, the individual is colorblind. A woman on the other hand, possesses two XX chromosomes. Colorblindness is recessive to normal eye sight and the woman may have the factor for it in one chromosome, but because of the presence of the other X chromosome, she is not colorblind. She may however be a carrier for it and can transmit it to some of her sons.

A colorblind man normally does not have colorblind children. QUESTION III: What causes sap

to rise to the top of a tree 200 feet high?

Several theories have been suggested, namely, those of atmospheric pressure, root pressure and capillary action. None of these is sufficient to raise the sap a distance of 200 feet. However, water has a very great cohesive force. It also adheres to the sides of the tubes. It thus forms, despite air bubbles, which do not entirely fill the vessels, a veritable rope of water. The energy of the sun is thought co pull this endless rope up

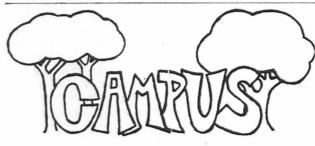

Grimm: Do you think that candidate put enough fire into his speech? Harry: Oh yes. The trouble was he did not put enough of his speech into the fire.

Dad: Your boy friend talks too much. He rattles on like a flivver.

I'm afraid he's a flat tire. Daughter: I know, Daddy dear, but his clutch is grand.

#### A Few Observations Concerning Water

1. For quenching thirst water has no equal.

2. Water and prteins are the chief ingredients in protoplasm. So important is water for protoplasm that an entire discussion of life on other worlds is based on the possibility of

liquid water existing on the stars and other planets than the earth. Where liquid water cannot exist, astronomers are satisfied that no life like our own can exist.

3. Water is termed the universal salvent. As a liquid for general dissolving purposes there is no equal. It is, for this reason, used extensively for washing-most dirt is dissolved by it.

4. Swimming or bathing is a much loved sport. Suppose, however, that water were as heavy as mercury; then a person, if he weighed the same as now, would scarcely sink at all in it. He would be unable to get his arms and feet in it so as to push himself forward. If it were but a little less heavy it would be impossible to stay afloat. It's bad enough for many people now.

5. Water accomodates us in winter. When the sun goes south giving us long dark nights, that which fell as rain then comes to us as snow. Since snow is a white substance it is much easier to see during winter evenings

6. Water moderates weather. It takes more heat to change a certain mass of water through a given range of temperature than almost any other thing. It is because of this fact that our best fruit belts are along large bodies of water. The water maintains a much more constant temperature than land, therefore the winds off the lakes keep the neighboring regions more constant than in other places. Hence the fruit trees do not blossom too early in the spring and suffer from late frosts.

On freezing water gives off eighty percent as much heat as it takes to raise it from the temperature of ice to that of steam. Freezing is, then, a warming process and melting is a cooling process. Without doubt the formation of snow and ice does much to prevent the temperature from falling abruptly. Tubs of water are when the water freezes.

used up in changing the water to a state (liquid, solid,) which has the

gas. 7. By being different than most melting is encouraged by pressure. snow, it makes sledding possible by things water saves life. ### Sports Chatter

Well you Alumni that didn't come to that Alumni-Varsity game miss-ed one of the best games played in Bedford Gymn for many a moon. If you think those varsity players weren't scared toward the last of the game. ask any of the boys.

We saw the Biss High School defeat Groveland High in the County eliminations at Perry last Friday night. As many Houghton students know, both teams are coached by "Houghtonites"; "Joe" Kemp at Bliss, and "Coach" Connor at Groveland. Not so bad, having two championship teams in this part of the country trained by former Houghton students!

Perhaps we can's get a rise out of the student body in regard to sports but anyone who read the letter from Professor Hazlett, former head of the English Department, will have to admit the Alumni sometimes express their feelings.

We were glad to read Mr. Hazlett's criticism of the various departments of the STAR and certainly appreciated his comments on our column, even though we do believe he was unduly harsh and somewhat out of tune with the situation here.

For the benefit of those who did not read Mr. Hazlett's criticism we shall reprint that part of his letter which referred to sports. Mr. Hazlett advocates a column dealing with items of interest about the village and the towns-people and says, "such a column would be vastly less obvious than your rehashed comments on World Athletics, which from a distance seem just a bit naive and redundant. A column of "snappy" comments on your own local athletic celebrities and events would be much more refreshing."

We want to thank Mr. Hazlett for this criticism, as all criticisms which are meant in the way we are sure Mr. Hazlett means the above, are greatly appreciated. In answering the criticism we must, however, state our position and give Professor Hazlett reasons why we believe he is somewhat in error.

Let us start on the first statement, that in regard to "rehashed" comments on "world" athletics. Well, rehashed is a good word, we admit that some of the information used has been taken from newspapers, but we wonder where the sports announcers sponsored by the Kendall Refining Company, the Clarke Teaberry Gum Company and many others get their information. information. We might be wrong but we'll venture to say that they don't have private correspondence with the sports celebrities they talk about on the air. Industries evidently believe the public is interested in world athletics enough for them to pay for these programs. Now in regard to "world" athletics. Are we to believe that Mr. Hazlett doesn't ap-prove of college students having a knowledge of what is going on in the world? Not only in sports but in every branch of news we believe it is the duty of every college student to have a knowledge of world affairs. Newspapers of various cities can be read in our library, but we believe that it can be safely said that the great majority of present day college students do not read the daily newspapers. It is based on this belief that many of the bits of news find their way into "Sports Chatter" in condensed form. All of Houghton's athletics are based on world athletics. All athletes judge their performances against those records made by athletes all over the country.. Does the fact that a new pole vault record was set a few days ago, not inter-est those who are interested in spotrs here? Will not those who take part in pole vaulting in the coming track and field meet measure their success by that same record?

Now in regard to a "snappy" column about our local athletics, and athletes. One thing a sports writer must do in Houghton, that is if he standing stars in the various sports. We are of course, a member of either the Purple or the Gold side, and if we designate a Purple man as a hero and do not also praise the other side we would immediately be accused of favoritism. It is for this reason we have held aloof from individualism in this column.

Lack of material is another reason why we are forced to go outside of Houghton for sports news. We have but one sport at a time here. Most schools have five or six all functioning during the same season. The basket-ball series has been over for several weeks and nothing is scheduled for some time to come. Where is the news to come from for this "snappy" some time to come. W column? What a life!
